

### **DIPOL 19/47 A** **Aerosol Mold Release agent for polymers**

#### **DESCRIPTION**

DIPOL 19/47 A is an aerosol release agent designed for:

1. Cold and hot cure polyurethane casting
2. High density rigid PU
3. Epoxy resins

DIPOL 19/47 A exhibits high release power and is suitable for application on metal, resin or silicone moulds.

Highly recommended for mold and model making.

#### **ADVANTAGES**

DIPOL 19/47 A provides the following advantages:

1. doesn't cause build up on the mold during use
2. provides a matt, uniform finish to the molded parts
3. Resistant at moulding temperatures up to 180-200 °C

#### **MOLD PREPARATION**

Clean the mold using our mold cleaner FINCLEASE 909 PU GEL (Brush cleaning) or FINCLEASE 931 PU (dip cleaning).

#### **APPLICATION**

Spray 2-3 layers of DIPOL 19/47 A. Wait for complete drying of each layer before applying the following one. To increase shine pass with a cloth before release coating is completely dry.

Apply a new layer of DIPOL 19/47 A after one or more demoldings as needed.

#### **PACKAGING**

Carton box containing 12x400 ml aerosol cans.
