

FINCOLUX BLU Wax Release Agent (paste)

DESCRIPTION

FINCOLUX BLU is a wax-based release agent specific for GRP composites finished with gelcoat.

TECHNICAL PROPERTIES

Composition: wax and polymers dispersion in organic solvents
Aspect: light blue paste

ADVANTAGES

- Easy to polish: glossy, uniform and smooth mould surface can be easily achieved.
- Excellent release properties
- Multiple releases.
- Minimal release agent consumption.
- Not flammable, mild odour, user friendly.

MOLD PREPARATION

Carefully clean the mould and remove all residues of previously applied release agents. Use FINCLEASE 2000 or FINCLEASE 915 on highly incrustated moulds.

APPLICATION

1. Apply a thin coat of FINCOLUX BLU on to the dry mould, using a cotton cloth. Remove quantity in excess.
2. Wait until drying and polish with a clean cotton cloth. Work on until achieving a high gloss finish. Remark: when the wax hardens polishing becomes difficult: preferably polish the surface within 1 hour after application.
3. Apply up to 8 coats of FINCOLUX BLU repeating steps 1 and 2
4. Let the surface to dry overnight before applying the gelcoat

PACKAGING

Carton boxes containing 6 x 700 gr. metal cans.
